OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Humpies	Fall 1990			TO SPAWN	
"	" 1991			"	
"	" 1992			"	
"	" 1993			"	

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: When we bought our house in 1990 a very large number of salmon were observed going up the stream. This held true until the Borough put in a road bordering the stream. Fewer were seen that year & very few in 1993. There were more salmon
